- It shows excellent skills against climate age

- 1-meter Column and 2 sides with 360° for infrared barriers
- Column body is formed by an anodized aluminium profile
- 2 orifices with Ø25 mm to ease electric wiring on both sides
- It shows excellent skills against climate agents
- It has EPDM joints that increase the polycarbonate mounting and assure the sealing
- Polycarbonate display is 3 mm thick
- The display enables the passage of the infrared beam and blocks the display of equipments installed inside
- At the same time, polycarbonate provides the column with a high resistance against acts of vandalism and other accidents
- The aluminium support is in black dust painted
- Adequate for mounting on wall and concrete bolster supports
- A mounting kit is included in every unit, as well as nuts and bolts, self-lockers and anti-opening tamper kit
