

PASSIVE BALUN TRANSCEIVER FOR CAMERAS WITH HDTV TECHNOLOGY

DESCRIPTION

- Highpassive passive transmitter, small size and easy installation, the color signal transmission distance is up to 200 meters, it is very suitable for medium-distance video surveillance, such as office buildings, the community, schools, hospitals, etc.

SPECS

- Plug & Play, power supply is not required
- Easy maintenance
- Direct installation on camera video output
- Compression cable terminals
- Color transmission distance via CAT 5 or CAT 6, up to 200 meters
- Bandwidth: DC 0 ~ 60MHz
- Impedance: 75Ω to 100Ω
- Gain difference of <2%
- Differential phase of <2%
- BNC connector
- Working temperature: -25°C ~ +70°C
- RH <95%

HDTV

KEY FEATURES

- Passive balun transceiver for cameras with HDTV technology
- 200 m maximum range with UTP Cat.5E cable
- Power supply is not required
