- Recommended for online maintenance
- 5 port Industrial Switch and outdoor box required

TERM-69 TERM-69

REMOTE MANAGEMENT OF MANUAL SYSTEM RESTART (ON / OFF)
FOR THE PAN / TILT UNIT OF THE SR7 DETECTION SYSTEMS

FEATURES

- Remote management of manual system restart (on / off) for the Pan / Tilt unit of the SR7 detection systems. Recommended for online maintenance.
- IP Management (1x RJ45 Ethernet port)
- 230Vac Power input
- Indoor (outdoor box not included)
- Note:
- Industrial Switch is required to plug the TERM-69 to the Pan-Tilt Unit and the Network (DAHUA-553 recommended)
- Do not use with TERM-74 (We can use the default accessories from the Pan-Tilt unit and install the TERM-69 plus the extra Switch and the indoor Transformer in one outdoor box together). Outdoor accessories from TERM-74 are unnecessary in this case when remote power management is used.
