

## VIM DEVICE WITH INTEGRATED ANALYTICS

### Detection and Tracking analytical device for 4 channels

Designed for small and medium-sized businesses as well as residential installations, VIM-XDT has 4 analytical video channels for remotely and real-time intrusion detection in controlled environments.

Detection & Tracking is the solution for detecting and tracking elements on video in real time that offers the highest robustness and performance on the market. Its algorithms have been specially designed to adapt automatically to a multitude of environments.

It offers a number of advantages:

- Real-time events
- Video associated with the moment the event occurred
- Recording by event. Integrated 32-gigabyte disk. Does not require an SD card.
- Post-event action protocols: Sending to CRA, lighting lights, email, etc.
- Access via mobile application.
- Secure solution, LINUX kernel-based VOS operating system.
- 2 years warranty
- No extra connector required for IP devices

**OPEN SOLUTION:**  
Compatible with the  
main CRA's  
management programs  
and manufacturers of  
cameras, Recorders, etc.

VIDEO INTEGRATION MODULE

DATA SHEET

REFERENCES	
VIM - ADT4	Device with 4 DT video analytics channels Protocols: Send to VSC
VIM - XDT4	Device with 4 DT video analytics channels Protocols: Unlimited (Notice to CRA, email, etc)

Technical specifications	
Storage	32GB internal storage
Dimensions	11,9 cm (W) x 11,9 cm (D) x 2,4 cm (H)
Weight	132g
Power and consumption	Power supply: 100-230V AC / 50-60Hz a 12v 1.5A, 18W at maximum performance.
Ports	USB - VGA - HDMI

Zone management

- Unlimited intrusion zones.
- Polygonal zones.
- Vertical and horizontal zones.
- Individually configurable zones: pre-alarm zones, intrusion zones.
- Virtual areas on image in real time.

Advanced logic

- Unlimited detection rules.
- Entry into zone.
- Directionality: passage from one area to another
- Defining relative sizes of people and vehicles for effective detection.
- Defining minimum and maximum sizes in perspective.
- Minimum time to detect marauders, abandoned / stolen object.
