Managed 4G Roaming SIMs

Suitable for any application with the ability to roam to all major networks

- Choose from a range of flexible data bundles to control costs
- Ability to roam on to 4G on all major networks, offering even greater resilience
- SIMs can also send data via 3G and 2G
- Data bundles vary from 1MB to 500GB and beyond!
- This ensures you have the appropriate package for your deployment
- The flexible tariffs can also be adjusted if the requirement of an application changes after installation
- Can be purchased quickly and easily via the M2M Connect portal
- Managed by the secure Gemini Global Platform
