

SOLUTIONS FOR TRANSPORTATION AND MERCHANDISE

PROBLEM

Every year, **freight losses on the roads** already amount to billions of euros in theft, fire, cargo damage due to temperature changes, etc.

SOLUTION

The **VESTA by Climax** system offers an ideal solution to **protect your cargo and equipment, adding IoT functions** in transport vehicles, even with special needs (refrigerators, international routes, etc.).

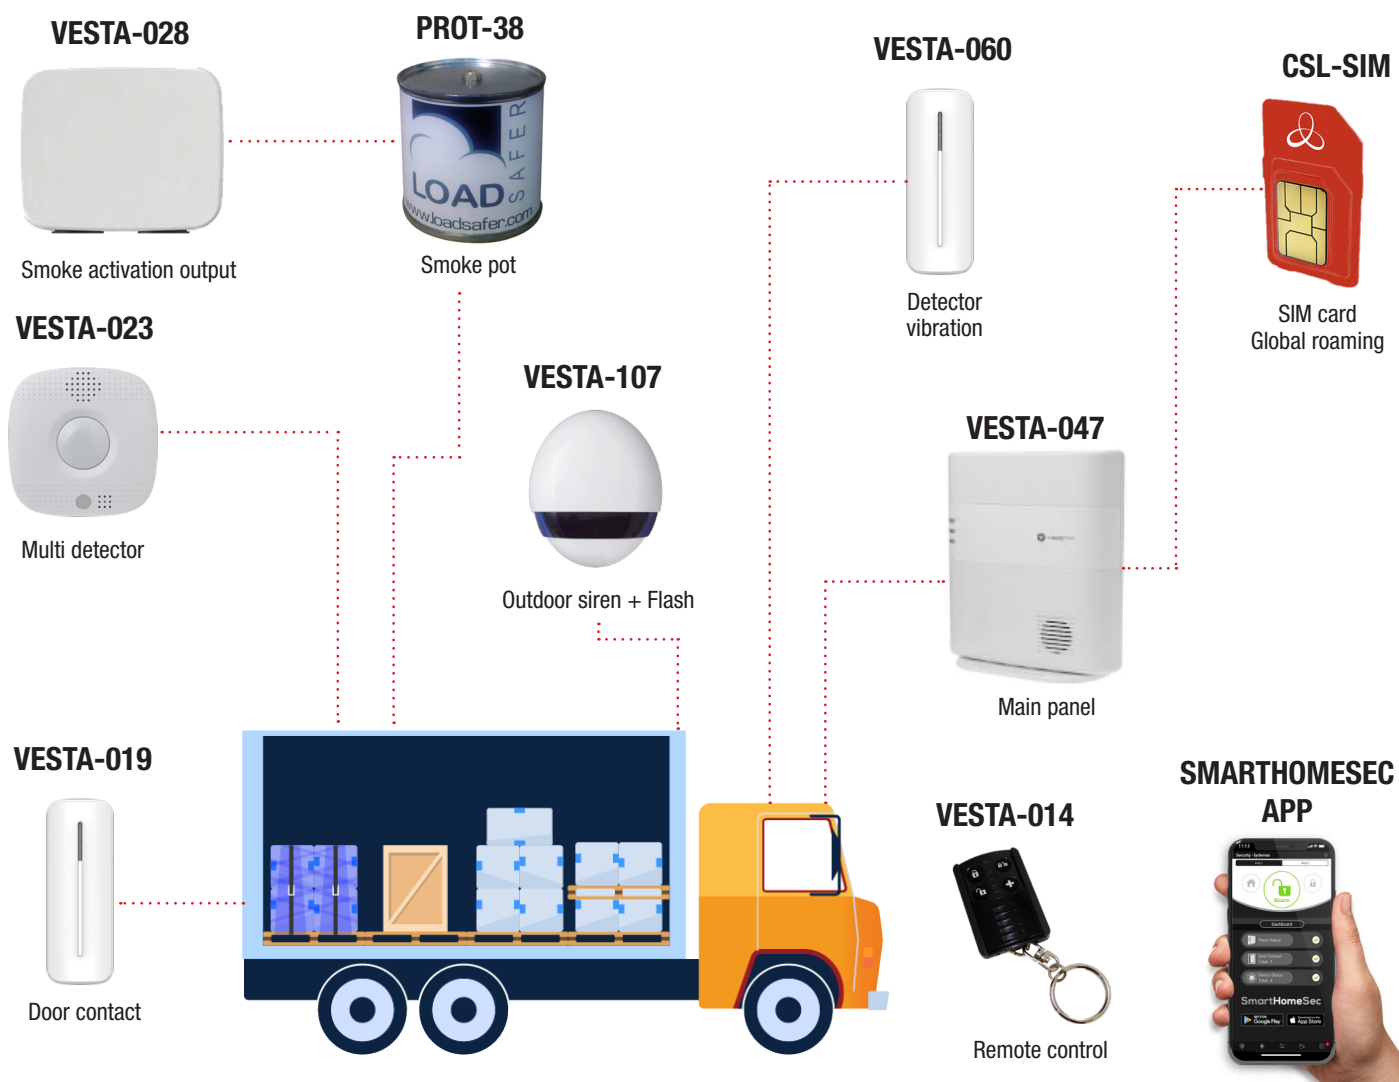

1. KIT PRO: PROACTIVE PROTECTION

Solution that adapts to every need

	BASIC	COMPLETE	PRO
VESTA-047 – Main panel	✓	✓	✓
VESTA-023 – Multi detector	✓	✓	✓
VESTA-060 – Vibration detector		✓	✓
VESTA-014 – Remote control		✓	✓
VESTA-107 – Outdoor siren		✓	✓
VESTA-019 – Magnetic		✓	✓
VESTA-028 – Smoke activation output			✓
PROT-38 – Smoke pot			✓
PROT-39 – Support for fixing the smoke canister in vehicles			✓
CSL-SIM – Global Roaming Sim Card	✓	✓	✓

- **Easy installation:** Configuration in less than 10 minutes, without requiring wiring between the driver's cab and the cargo trailer.
- **Up to 4 years battery** of the devices.
- **Very low consumption** of the main panel (0.3Ah).
- **Great autonomy** due to its low consumption, with operation in a vehicle without battery charge for approx. 27 days.
- **Security.** Anti-intrusion system with instant notifications in case of alarm.
- **Real-time information.** Notifications and status visualization instantly for total control: alarm for detection of movement, temperature, smoke, etc.
- **Easy to use.** Armed and disarmed by remote control and / or SmartHomeSec app remotely.
- **Avoid theft.** Motion detection alarm inside the cargo trailer.
- **Avoid fires.** Smoke detection alarm with instant notification to the user, to prevent possible fires.
- **Avoid damage to cargo.** Notifications in case of temperature change with creation of rules (eg if the inside of the cargo trailer exceeds 20°C, the system would notify it immediately), to maintain control and quality.
- **Simplicity.** Power supply of the main panel at 12V (with the possibility of feeding directly from the 12V output).
- **Control.** Management of multiple vehicles by the same user (same app user and remote control).
- **Without limits or borders.** With the CSL-SIM global roaming card, the panel will remain connected in all routes and countries, thanks to multi-operator M2M technology.
