

WHY IS THE VESTA BY CLIMAX SYSTEM THE ULTIMATE AND MOST INNOVATIVE INTRUSION SYSTEM? v1

Latest generation system

VESTA by Climax is the most innovative brand in terms of wireless home security systems, medical alarms, home automation systems and a wide range of accessories.

Home automation and automated system

It has the most **advanced and innovative devices**:

- **Z-Wave** connection, which allows you to connect home automation and IOT elements
- Integration with the best home automation and **IoT device** manufacturers through the Z-Wave and ZigBee protocols
- Integration with **Alexa or Google Home**, to activate with voice command, as well as control home automation devices

Control from APP and web SmartHomeSec

The VESTA **SmartHomeSec** mobile or web application allows immediate and remote control and management of the security and video surveillance system, as well as smart home devices. The installer section allows the configuration of the system and also its management.

05

More complete and versatile system

It has the **most complete range of products**, consisting of over 50 devices, offering a complete **solution for a high level of security**:

- Via radio with a range of **2 km**
- Exclusive **F1** technology, for greater stability
- Ethernet, **2G or 4G** connection and possibility via Wi-Fi
- Average programming of **10 min**, to minimize installation costs

Energy saving control

It allows the **optimization of energy resources and greater efficiency in the protected area**, thanks to the analysis and immediate control offered by the various integrated devices.

Camera integration with video analysis

Thanks to the ability to easily add **up to 6 Dahua IP cameras** (Firmware 2019 and later), **it is now possible to see what they are recording live**, as well as receive a **15 sec video sequence** during an alarm.

Compatible with the platform intelligent ALARM.COM

To offer a **pioneering solution for smart home and business management**, VESTA and ALARM.COM have carried out a joint development of both platforms, obtaining a set of tools that allow the **optimization of internal processes**.

Grade 2 and 3 systems

Strict compliance with legal requirements and the high level of safety give VESTA by Climax System the **Grade 2 certification**, medium risk. For its part, the hybrid central obtains **Grade 3 certification**, which is essential for high-risk spaces.

07

08

Compatible with video intercoms

Thanks to the VESTA video door phone, an indoor screen is no longer necessary. Now you can **see and talk on the phone with the person calling your video intercom**, very useful in case of absence. **It is also possible to receive a 15 second video stream** when the intercom detects an unwanted presence thanks to the integrated PIR.

09

10

Revolutionary systems adapted to your needs

The latest VESTA innovations are the integration with **SALTO's smart lock**, which allows remote control, as well as the **battery panel**, 100% autonomous, grade 2, and the **hybrid panel**, of a minimum of 16 wired zones, of grade 3.
